

**SCHOOL DISTRICT OF PITTSVILLE  
BOARD POLICY**

**FISCAL MANAGEMENT**

**PURCHASING**

**PROCUREMENT METHODS FOR SERVICES, SUPPLIES, EQUIPMENT, AND OTHER PROPERTY 672.1**

This policy sets forth requirements and expectations related to methods of procurement, including purchases that are made, in whole or in part, using federal funds that have been awarded to the District. The District Administrator and Director of Business Services have primary administrative responsibility for directing and overseeing the implementation of this policy as a component of the District’s overall procurement procedures and within a system of internal controls that supports the District’s processes for budgeting, procurement management, accounting/financial management, and property disposition.

While this policy grants authority for employee or non-employee procurement agents to utilize relatively informal competitive processes and even noncompetitive methods in some situations, such authority does not:

1. Permit any District procurement agent to disaggregate a purchase into multiple transactions in an uneconomical manner with the intent and purpose of avoiding a cost threshold that requires a more demanding procurement method.
2. Preclude District procurement agents from lawfully going beyond any minimally-required and minimally-acceptable procurement procedures for the purpose of (a) enabling the District to make a more informed decision, (b) enhancing the District’s competitive and bargaining position with respect to a procurement decision, or (c) otherwise increasing the tangible or intangible value that the District can derive from a particular purchase or contract. For example, the District may obtain multiple price quotations for a purchase even in circumstances that are considered “micro-purchases” under this policy.

All persons involved in the procurement of services, supplies, equipment, or other property on behalf of the District are responsible for ensuring that (1) their actions and decisions are within the scope of their authority, and (2) they sufficiently understand and make all reasonable efforts to comply with applicable laws, School Board policy, and established District procedures.

**Procurement Supported by Federal Funds**

A. Cost Thresholds and Procurement Methods (federally-funded procurement)

When procuring services, supplies, equipment, or other property involving the use of federal funds that are subject to the procurement standards found in the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (“Uniform Guidance”), the District shall use a procurement method that (1) at a minimum, is consistent with the Uniform Guidance (including all federally-authorized exemptions from the normal requirements of the Uniform Guidance), as summarized at a general level in the following chart; and (2) implements any additional mandatory procurement procedures/requirements established by state law or by the District that are not in conflict with the Uniform Guidance:

<b>Cost Threshold</b>	<b>Allowable Federal Procurement Methods</b>
<b>Micro-purchases:</b> In aggregate amount, the purchase does not exceed \$10,000, except that for construction	“Micro-purchases” of supplies or services (as defined in the federal regulations) may be made or awarded without soliciting competitive quotations to the extent any of the following determines that the cost of

<p>projects subject to the federal Davis-Bacon Act, an amount that does not exceed \$2,000.</p>	<p>the purchase/contract is reasonable: a district employee who is authorized to make the purchase directly.</p> <p>Where multiple qualified suppliers of the same or materially interchangeable products/services have been identified and such suppliers offer effectively equivalent rates/prices and other terms, repeated micro-purchases that are subject to the Uniform Guidance are to be reasonably distributed among different suppliers when practical.</p> <p>A purchase at this micro-purchase tier may also be documented as a noncompetitive purchase there are grounds for doing so as specified under the Uniform Guidance.</p>
<p><b>Simplified Acquisition:</b></p> <p>Unless the purchase qualifies as a “micro-purchase”, any purchase that does not exceed <del>\$150,000</del> 250,000, which serves as the District’s federal “simplified acquisition threshold.”</p>	<p>Such purchases may be based on any of the following:</p> <ol style="list-style-type: none"> <li>1) Multiple price or rate quotations must be obtained in advance from qualified sources, as further detailed in District procurement procedures, <u>unless</u> a valid basis exists under the Uniform Guidance for relying on procurement by a noncompetitive proposal (i.e., “single source” procurement).</li> <li>2) To the extent required by federal regulations, the District will negotiate profit as a separate element of the price for each contract that is awarded in the absence of price competition.</li> </ol>
<p><b>Formal Procurement:</b></p> <p>Purchases in an amount that exceeds <del>\$150,000</del> 250,000 or more, as federally indexed.</p>	<p>The District shall conduct a cost or price analysis for these purchases that, at a minimum, shall include making an independent estimate before receiving bids or proposals (including noncompetitive proposals). Whenever appropriate and relevant to the specific transaction, the cost analysis may include life-cycle cost estimates which shall then be incorporated into any solicitation of bids or proposals.</p> <p>Procurement shall be made by sealed bids or by competitive proposals <u>unless</u> a valid basis exists under the Uniform Guidance for relying on procurement pursuant to a noncompetitive proposal (i.e., “single source” procurement). However, no construction, facility remodeling, or other public works capital project with an aggregate cost of \$150,000 or more shall be conducted under a “single source” rationale without the express approval of the Board.</p> <p>To the extent required by federal regulations, the District must negotiate profit as a separate element of the price for each contract involving expenditures at or above this cost threshold.</p>

The above chart represents a starting point for identifying an appropriate and lawful procurement method for purchasing that is subject to the Uniform Guidance. Many additional details, requirements, restrictions, and procedures are established in the federal regulations. In certain cases, other federal laws and regulations establish additional requirements and/or affect the specific application of the Uniform Guidance.

**Methods of Procurement for purchases that do NOT involve the use of Federal Funds Subject to the Uniform Guidelines will follow Policy 672: Purchasing Authority to Make Purchases and Enter into Procurement Contracts.**
