Child Care Center

Director of Child Care Center Board Report December 9, 2019

Infant/Toddler News

- In the infant toddler room we have hit our groove and have started exploring different textures of food and other objects. Everyday we work on our large motor skills by either going outside or into the multi-purpose room to run around, play with balls, and ride bikes! Most recently, we practiced using our fine motor skills by unwrapping snack boxes.

Preschool News

- The Month of November we started our Learning Without Tears Curriculum. The kids really have been enjoying the learning Activities ,which include Numbers & Math, Language & Literacy, Readiness & Writing. We also have been talking about things we are thankful for and ways we can show we are thankful. The Dramatic play area was changed to a Pizza Restaurant which was Loved by All.

Child Care Center

BASP

- In our BASP room, the kids have been busy coming up with ideas to make some changes to our room. We have been asking the kids what they are interested in playing or working with while they are here at before and after school.
- We are hoping to make some changes to make the room more comfortable and offer a variety of current favorite activities.

Looking ahead- we have started a waitlist for our I/T room. We have a family with an infant due in early 2020 who has already reserved a full-time spot. I have also had a couple parents reaching out to me looking ahead for next summer and fall.
