SCHOOL DISTRICT BUDGET AND ACCOUNTING

Budget Reporting

Accounts used in school district budgeting and financial reporting are designated by the Department of Public Instruction. A uniform accounting system is important for the facilitation of reporting, auditing, data processing, inter-district comparisons, and financial accounting for cooperative programs. A complete list of allowable account codes and account code explanations are available for review on the website at: [Wisconsin Uniform Financial Accounting Requirements](#).

Fund Accounting

Financial administration requires that each transaction be identified for administrative and accounting purposes. The first identification is by fund, which is an independent fiscal, and accounting entity, requiring its own set of books, in accordance with special regulations, restrictions, and limitations that earmark each fund for a specific activity or for attaining certain objectives. Each fund must be so accounted for that the identity of its resources and obligations and its revenues and expenditures is continually maintained.

All funds used by Wisconsin school districts must be classified into one of nine fund types. The major fund types are the General Fund, Special Projects Fund, Debt Service Fund, Capital Projects Fund, Food Service Fund, Custodial (Pupil Activity) Fund, Fiduciary Fund, Community Service Fund, and Package and Cooperative Program Fund.

Basis of Accounting

The basis of accounting refers to the point in time when revenues, expenditures or expenses and the related assets and liabilities are recognized in the accounts and reported in the financial statements. In other words, the basis of accounting determines the timing with which the accounting system recognizes transactions.

Governmental funds, expendable trust funds, and custodial funds use the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recognized when they become both measurable and available (susceptible to accrual). Measurable means the amount of the transaction can be determined and available means collectible within the current period or soon enough thereafter to pay liabilities of the current period. State general and categorical aids, federal impact aid, and other entitlements are recognized as revenue at the time for receipt or earlier if the susceptible accrual criteria are met. Expenditure-driven programs currently reimbursable are recognized as revenue when the qualifying expenditures have been incurred.

Expenditures are generally recognized under the modified accrual basis of accounting when the related fund liability is incurred. Employee services and payroll-related costs (employee health, dental, life, disability insurance; Social Security tax; Medicare tax; Wisconsin Retirement System contributions; annuities, and other garnishment) other than compensated absences, termination, and other post-employment benefits are recognized in the fiscal period when incurred.

The following tables provide actual audited results for 2024-2025, unaudited results for 2025-2026 to May 29, 2026, unaudited revised budget for 2025-2026, and proposed budget for 2026-2027. Details of the budget can be viewed at the District Office by contacting the Superintendent.

TAX LEVY EXPLANATION

The school district tax levy is made up of several components. These include:

- Amount of operational dollars needed-General Fund, Community Service Fund levies
- Amount of debt service tax dollars needed-Debt Service Fund levy
- Equalized value of property in the school district
- Mill (tax) rate

The tax levy is the total amount of property taxes levied or assessed to municipalities in our school district to fund school operations. The maximum tax levy amount, other than referendum-approved long-term debt or long-term debt incurred prior to 1993, is determined through the state's revenue limit formula. Taxpayer approval, through the referendum process, is required if a school district wants to exceed the revenue limit. The tax levy approved at the Annual Meeting may be adjusted by the Board of Education until November 1, if the Department of Public Instruction (DPI) modifies the district's state equalization aid amount for the fiscal year.

Equalized valuation is the fair market value of all properties within a school district as determined by the Wisconsin Department of Revenue. The Wisconsin Department of Revenue uses property sales information to determine a municipality's equalized "fair market" valuation. This information is reported to the school district in October of each year.

The school district distributes the certified (approved) tax levy among the municipalities according to the proportion of equalized value each municipality has in comparison to the total equalized value of the school district. Each municipal treasurer distributes this levy among the various residents based on the assessed value of the property within the municipality. Therefore, the actual tax assessed by each municipality will rarely be the District's true mill rate.

Equalized valuation plays a very important role in determining the school mill (tax) rate. In October, the actual certified equalized values of all municipalities within the school district are reported by the Department of Revenue. The district then calculates the actual mill (tax) rate per thousand dollars of equalized valuation.

To calculate the school mill (tax) rate, the district uses the tax levy certified (approved) by the School Board in October and divides that amount by the total equalized value of the school district. The mill rate is defined as the rate one thousand dollars of equalized valuation will raise in property taxes. Property owners in a municipality having more than one school district, fire district, or other governmental entity may find that mill rates vary within the municipality. Property owners may realize different changes (typically increases) in their property assessments depending upon conditions within their community and surrounding communities.

The School Board is proposing a total tax levy of \$5,566,028 to fund the 2026-2027 budget. To determine the rate per thousand, the district divides the total levy of \$5,566,028 by the estimated equalized value of the district, \$691,403,590. This produces a projected mill (tax) rate of \$8.05033. The final levy is set at the end of October or beginning of November. The Board is required to make any adjustments, if needed, to the levy on or before November 1, 2026.

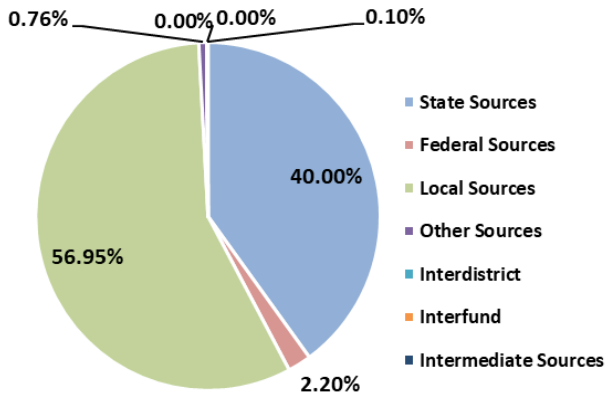

Changes in the amount of state aid directly affects the local tax levy. Wisconsin Act 16 implemented revenue limits beginning with the 1993-1994 school year. A district's revenue limit is the maximum amount of revenue that may be raised through state general aid and property tax for the General Fund, whenever general state aid changes for a district there is a direct impact on the tax levy.

Due to the effects of the federal government's numerous and rapid changes in funding information there are numerous unknowns in the federal and state budget forecasts at this time. The Pittsville School District's budget is created based on what is in the federal and state budget as of May 29, 2026.
